Authorization for this examiner's amendment was given in a telephone interview with Mr. Scott Asmus on February 18, 2005.

The application has been amended as follows:

On page 1, line 8 of the specification, after the phrase 'March 17, 2000' insert the phrase -- , now U.S. Patent No. 6,441,340 --.

In Claim 8, replace the term 'Amended' with the term --Presented--.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art of record discloses a packaging material having a microperforations, but fails to disclose a packaging which provides optimum atmospheric conditions having microperforations placed in a registered target area which is a finite region on the polymeric material, and having microperforations which provide a total oxygen flux ranging from 150 cc/day-atm to 5,000,000 cc/day-atm and atmospheric conditions containing less than about 20.9% oxygen and greater than about 0.03% carbon dioxide. The Examiner stated in the Advisory Action of August 27, 2004 that the claimed invention was not patentable, but at that time the Examiner had not

considered the arguments of the After – Final Amendment submitted by Applicant on August 27, 2004, because the After – Final Amendment and Advisory Action had crossed in the mail. Based primarily on the arguments, the Examiner reconsidered the position that the claimed invention was not patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
